

**Title of Invention: A Method for Updating and Displaying Information
and an Alive Patent Map Thereof**

ABSTRACT

5

The present invention provides a method for updating and displaying information,
which comprises a matrix program that operates as a program to analyze a data list and
to form a table separately by setting a plurality of keywords, then produce an alive
matrix map (30) after the analysis result is matched and the table is created; therefore,
10 the alive matrix map (30) can add new data lists without repeating the tedious setting
steps.
