

Extendable Panel

Abstract

The present disclosure provides an extendable panel (10) comprising a main panel (1) and a side panel (2). The main panel (1) includes a power jack or switch and the side panel (2) comprises a first interface (23) including a first connecting structure (13), which is suitable for forming a detachable connection with an external functional module (3). The present disclosure further provides an extendable panel assembly (20) comprising a panel (10) and an external functional module (3). The extendable panel allows the user to easily and conveniently extend or replace various external functional modules to satisfy their various demands.
