A METHOD OF PROVIDING A TABLE GAME AND AN ASSOCIATED SYSTEM

ABSTRACT

The embodiment provides a method of providing a table game at a table 3 to at least one player 5 having a mobile digital device 21. This method allows the player 5 to avoid touching traditional gaming elements, such as chips, cards, etc. The player's mobile digital device 21 is configured to communicate with a gaming server 2 so as to allow the player 5 to participate in the table game.
