(54) Title: INDICATING PROGRAM POPULARITY

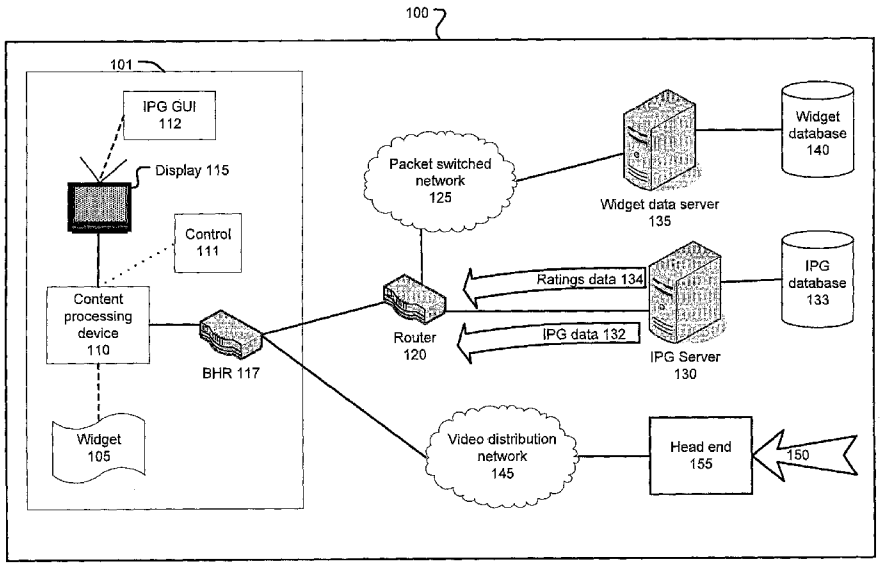

FIG. 1

(57) Abstract: Data is transmitted from content processing devices to a server, the data relating to a number of times that each of one or more media programs have been accessed within a given time period. The data is aggregated to obtain an aggregate number of times that each of the one or more media programs has been accessed within the given time period. An indication of popularity for each of the one or more media programs may be determined from the data.
