(54) Title: A COMMUNICATION SYSTEM

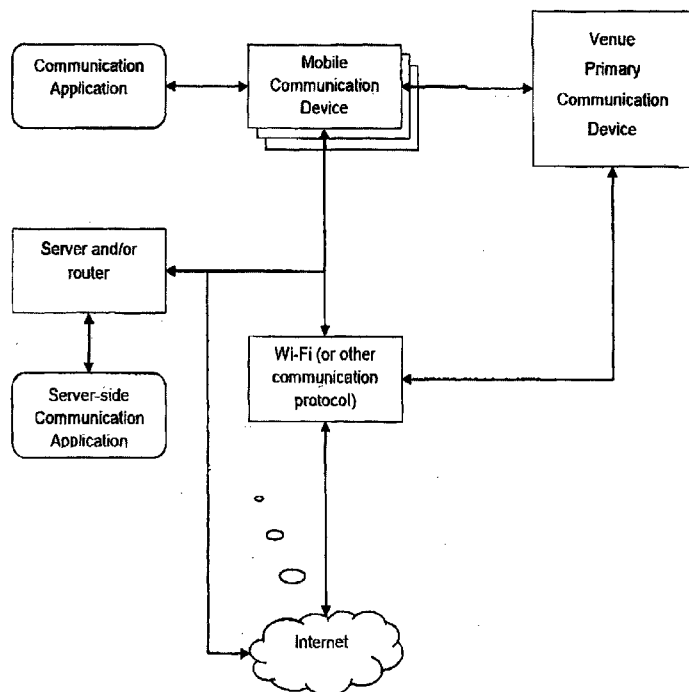

Figure 1

(57) Abstract: Disclosed herein is a system for communication between users in a venue. The system comprises: detecting a first communication device recognisable by a primary communication device in a venue, the primary communication device capable of transferring details of the venue, the first communication device being capable of receiving details of the venue; transferring the details of the venue from the primary communication device to the first communication device; and displaying the details of the venue on the first communication device and illustrating location based information of one or more second communication devices being first communication devices of other users.
