PATENT

USE OF 2-AMINO-4-HETEROARYLETHYL-THIAZOLINE DERIVATIVES AS INHIBITORS OF INDUCIBLE NO SYNTHASE

AVENTIS PHARMA S.A.

ABSTRACT

The present invention relates to the use of 2-amino-4-heteroarylethylthiazoline derivatives of formula (I)

(I)

in which Het represents a thienyl, pyrimidyl, pyridyl or thiazolyl radical or their pharmaceutically acceptable salts as inhibitors of inducible NO synthase.
