(54) Title: CONDUCTIVE PAPER AND METHOD OF FORMING THE SAME

FIG. 1

100

(57) Abstract: In various embodiments, a conductive paper may be provided. The conductive paper may include a first layer including an electrically conductive nanostructured material. The conductive paper may also include a second layer over the first layer, the second layer including a cellulose material. The conductive paper may further include an intermediate layer between the first layer and the second layer, the intermediate layer including the electrically conductive nanostructured material interspersed between the cellulose material.
