**CLAIMS**

1. Compositions comprising:
   a. an amino acid mixture consisting of glycine, L-proline, L-leucine, L-lysine, L-valine and L-alanine;
   b. hyaluronic acid or salts thereof;
   c. malic acid, succinic acid or the pharmaceutically acceptable salts thereof.
2. Compositions according to claim 1 wherein the weight ratios of the amino acids are:
   - Glycine 1;
   - L-Proline: 0.7-0.8;
   - L-Alanine: 0.47-0.76;
   - L-Valine: 0.35-0.56;
   - L-Leucine: 0.13-0.27;
   - L-Lysine hydrochloride: 0.10-0.12.
3. Compositions according to claim 1 or 2 wherein the weight ratio of malic acid to succinic acid is 1:1.
4. Compositions according to any one of claims 1 to 3 wherein the weight percentage of the mixture of amino acids is between 5 and 30%.
5. Compositions according to any one of claims 1 to 4 wherein the weight percentage of malic acid or a pharmaceutically acceptable salt thereof is between 1 and 5%.
6. Compositions according to any one of claims 1 to 5 wherein the weight percentage of succinic acid or a pharmaceutically acceptable salt thereof is between 1 and 5%.
7. Compositions according to any one of claims 1 to 6 wherein the hyaluronic acid or salts thereof, in particular sodium hyaluronate, has an average molecular weight ranging between 50,000 and 2,500,000 Da, in percentages ranging between 1 and 5% by weight of the total composition.
8. Compositions according to any one of claims 1 to 7 in the form of sterile solutions for injection or in a form suitable for topical administration.
9. Non-therapeutic use of the compositions of claims 1-8 in counteracting and preventing skin aging.
