

CONTROL APPARATUS AND CONTROL METHOD

ABSTRACT

5 Provided is a control apparatus and a method
capable of more appropriately controlling the
operation of a door of a railway vehicle according
to various situations.

10 An integrated control apparatus 212 and a
control apparatus 322 according to an embodiment
control an operation of a door of a railway vehicle.
Specifically, the integrated control apparatus 212
and the control apparatus 322 start to close the
door of the railway vehicle 300 that is stopped at a
15 station, based on at least one of: information about
a situation of an inside of the railway vehicle 300;
and information about a situation of a platform of
the station at which the railway vehicle 300 is
stopped.
