

Abstract

An adhesive sheet 1 is used in which a non-crosslinkable adhesive composition layer 5 is provided on a base material film 3 and ranges from 700,000 to 2,000,000 in weight average molecular weight and 5 in molecular weight distribution, and a (meth)acrylic acid ester copolymer containing no functional group reacting with an isocyanate-based curing agent or an epoxy-based curing agent is included as a main component of the composition. The above functional group reacting with an isocyanate-based curing agent or an epoxy-based curing agent may be a carboxyl group or a hydroxyl group.
