

COVER FILM AND ELECTRONIC COMPONENT PACKAGE USING SAME

ABSTRACT

[Problem] The present invention addresses, as a main problem, that of providing a cover film having both anti-blocking properties and stability of peel strength. [Solution] A cover film that is a laminated film having at least a substrate layer (A), an adhesive layer (B), an intermediate layer (C), and a heat-sealable layer (D), wherein a surface of the heat-sealable layer (D) not contacting the intermediate layer (C) has bumps, and the bumps are arranged so as to be staggered with respect to a widthwise direction and a lengthwise direction of the laminated film.
