(54) **Title:** VEHICLE TRANSPORTATION ROOM SYSTEM AND METHOD

(57) **Abstract:** A vehicle transportation room system and method are disclosed. In one embodiment, a system may include a ride vehicle (14) disposed on a ride path (22, 42) and a launch room vehicle (10) may be configured to align with the ride vehicle on the ride path and include an at least partial room (12). The launch room vehicle may be configured to house the ride vehicle in the at least partial room and to move with the ride vehicle and then break coordination with the ride vehicle such that the ride vehicle launches from the at least partial room. Further, the launch room vehicle may include a show element (106) that is operated as the at least partial room moves with the ride vehicle to simulate that the show element is interacting with the ride vehicle.
