(54) Title: DELAY STATUS REPORT

FIG. 3

(57) Abstract: Embodiments of the present disclosure relate to a delay status report (DSR). In an aspect, a terminal device determines a criterion for one or more data units. The one or more data units are buffered and not submitted to a lower layer in a packet data convergence protocol (PDCP). Moreover, the terminal device triggers, based on said criterion, a DSR comprising a data volume of the one or more data units and a remaining time associated with the one or more data units. In this way, it is possible to improve the DSR reporting with enhanced efficiency.
