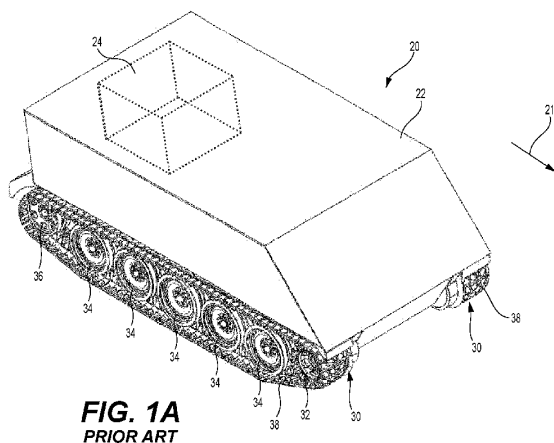

FIG. 1A
PRIOR ART

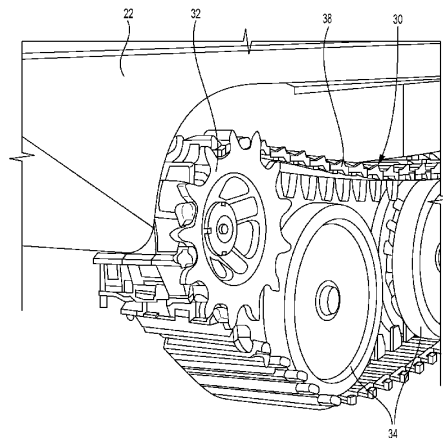

FIG. 1B
PRIOR ART

(57) Abstract: Track assemblies, wheels, endless tracks and track assembly conversion kits are disclosed. One track assembly includes a wheel, which has a rim and a plurality of engaging elements, defines a plurality of grooves, and an endless track including a body and a plurality of lugs extending outwardly from a first lateral side of the body. Each lug of the plurality of lugs is sized and shaped to be received in a respective groove of the plurality of grooves such that, a given one lug of the plurality of lugs extends across the rim of the wheel to be received in the respective groove. One elastomeric endless track has a body, a plurality of longitudinally spaced driving lugs extending from the body, and a plurality of longitudinally spaced outer lugs extending from an outer face of the body, the outer lugs being longitudinally offset from the driving lugs.
