amendments (Rule 48.2(h))

(54) Title: IMPROVING SPACING AND/OR VENTILATION CONDITIONS IN THE CULTIVATION ENVIRONMENT OF
PLANTS

Fig. 1A

(57) Abstract: A method of increasing interspace among plant containers. The method comprises: providing a set of plant containers, the set comprising first and second plant containers; arranging the first plant containers in a first structured grid formation along a horizontal plane; and arranging the second plant containers in a second structured grid formation along said horizontal plane, whereby when viewed from above the first and second plant containers are alternately arranged in a joint structured grid formation in a first area. The method comprises, for increasing the interspace among the plant containers, mutually simultaneously moving the second plant containers in their second grid formation away from the first plant containers in a vertical direction and subsequently placing the second plant containers in a second area.
