(54) Title: COMBINATION OF AN ANTIBODY-DRUG CONJUGATE AND AN ANTIBODY-SAPONIN CONJUGATE

(57) Abstract: The invention relates to a therapeutic combination comprising: (a) a first pharmaceutical composition comprising a conjugate comprising a first binding molecule for binding to a first binding site of a cell- surface molecule and the conjugate comprising a saponin bound to said first binding molecule, wherein the saponin is a triterpene glycoside; and (b) a second pharmaceutical composition comprising a conjugate comprising a second binding molecule different from the first binding molecule, the second binding molecule comprising a second binding region different from the first binding region, for binding to a second binding site of said cell-surface molecule different from the first binding site of said cell- surface molecule, and the conjugate comprising an effector molecule covalently bound to said second binding molecule. The invention also relates to a pharmaceutical composition comprising said two conjugates. In addition, the invention relates to the pharmaceutical combination or the pharmaceutical composition of the invention for use as a medicament. Furthermore, the invention relates to the pharmaceutical combination or the pharmaceutical composition of the invention, for use in the treatment or prevention of a cancer, an autoimmune disease, a disease relating to (over)expression of a protein, a disease relating to an aberrant cell such as a tumor cell or a diseased liver cell, a disease relating to a mutant gene, a disease relating to a gene defect, a disease relating to a mutant protein, a disease relating to absence of a (functional) protein, a disease relating to a (functional) protein deficiency.
