

TITLE

PEPTIDES OF USE IN THE PREVENTIVE AND CURATIVE TREATMENT OF ALOPECIA

ABSTRACT

The object of the present invention relates to a novel family of peptide conjugates of formula (I):

(I)

wherein:

- A represents a hydrogen atom, a C₆ to C₂₀ acyl group or a cholesterol residue;
- X₁ represents a covalent bond, an alanine or a proline;
- X₂ represents an arginine, a lysine, or an alanine;
- X represents a lysine, an alanine, or a phenylalanine; and
- B represents a hydroxyl or an amine;

or one of its preferentially pharmaceutically, dermatologically or cosmetically acceptable salts,

as well as their synthesis processes and their uses for reducing hair loss and stimulating hair growth.
