(54) Title: SEGMENTED TRACK AND TRACK SEGMENT THEREFOR

(57) Abstract: A segmented track made of a plurality of elastomeric track segments is disclosed. Each track segment is made of reinforced elastomeric material and is provided, at each end thereof, with a joint element adapted to be connected to the joint element of adjacent track segments. Each track segment generally comprises alternating series of substantially rigid sections and substantially flexible sections. The joint elements of the track segments are substantially located within rigid sections located at the extremities of the track segments. The segment track also comprises inner and outer plates configured to secure the joint elements of adjacent track segments together.
