

ABSTRACT

PROCESS FOR THE MANUFACTURE OF AQUEOUS SOLUTIONS OF
UNSATURATED QUATERNARY AMMONIUM SALTS

Process for the manufacture of an aqueous solution of the unsaturated quaternary ammonium salt corresponding to the following formula (I):

by reaction, under pressure and in the presence of water, of N,N-dimethylaminoethyl methacrylate with $\text{CH}_3\text{-Cl}$, characterized in that it is carried out in the presence of the pentasodium salt of diethylenetriaminepentaacetic acid.
