

ABSTRACT

The present disclosure relates to a learning situation analysis method and apparatus, an electronic device, a storage medium and a computer program. The method includes: acquiring
5 in-class video data to be analyzed; obtaining an in-class action event by performing a student detection on the in-class video data, wherein the in-class action event reflects an action of a student in class; and determining a learning situation analysis result corresponding to the in-class video data based on the in-class action event, wherein the learning situation analysis result reflects a learning situation of the student in class.
