

ABSTRACT

There is provided a wig base, wherein a combined mesh pattern is formed by overlapping a first net member (21) having a first mesh pattern with a polygonal shape, and a second net member (22) having a second mesh pattern with a polygonal shape, the combined mesh pattern is formed by meshes located inside an outer edge of the first net member (21) and meshes located inside an outer edge of the second net member (22), and the combined mesh pattern includes meshes whose mesh sizes are relatively different, and a wig formed by planting false hairs to the wig base.
