

ABSTRACT

COMPOSITIONS AND METHODS FOR THE TREATMENT OF XEROSTOMIA

The invention relates to the compounds or its pharmaceutical acceptable polymorphs, solvates, enantiomers, stereoisomers and hydrates thereof. The pharmaceutical compositions comprising an effective amount of compounds of formula I, formula II, formula III, formula IV and formula V and the methods for the treatment of xerostomia may be formulated for oral, buccal, rectal, topical, transdermal, transmucosal, lozenge, spray, intravenous, oral solution, buccal mucosal layer tablet, parenteral administration, syrup, or injection. Such compositions may be used to treatment of oral mucosal inflammatory, dry mouth or oral dry mouth mediated infectious diseases.
