CELL CULTURE BAG AND CELL CULTURE METHOD

ABSTRACT

There is provided a cell culture bag 10 including: plural tubular portions 11 having gas permeability in which a tube axis direction is directed to a first direction and which are arranged side by side in a second direction intersecting with the first direction and are separated from each other using a partition wall; and communication portions 12 having gas permeability which allow communication between two mutually adjacent tubular portions 11 of the plural tubular portions 11 in an intermediate region R between one end and the other end of the tubular portions 11.
