

ABSTRACT OF THE DISCLOSURE (FIG. 2)

"METHOD OF AND APPARATUS FOR DRIVING A SPINDLE
MOTOR AND A VOICE COIL MOTOR IN A DISK DRIVE"

5

In the high-speed seek mode in which priority is
given to making the seek operation faster, the CPU
sets the driving voltage applied to a motor driver
that drives both a spindle motor and voice coil motor
10 to a first driving voltage. Furthermore, in the high-
efficiency mode in which priority is given to reducing
the power loss in the motor driver, the CPU sets the
driving voltage applied to the motor driver to a
second driving voltage lower than the first driving
15 voltage.
