(54) Title: METHOD AND APPARATUS FOR OFFLOADING TRAFFIC FROM CELLULAR TO WLAN USING ASSISTANCE INFORMATION

(57) Abstract: A method and apparatus may be configured to receive, by a user equipment, offloading assistance information from a network element of a first network. The method may also comprise receiving, by the user equipment, at least one offloading related policy for offloading traffic to at least one second network. The offloading related policy may comprise a policy validity criterion that takes the offloading assistance information into account. The method may also comprise applying the offloading related policy in the user equipment if the policy validity criterion is met.
