(54) Title: COMMUNICATION APPARATUS AND COMMUNICATION METHOD FOR MULTI-USER MULTIPLE INPUT MULTIPLE OUTPUT TRANSMISSIONS

WO 2021/256989 A1

700

Fig. 7

(57) Abstract: The present disclosure provides communication apparatus and communication method for multi-user multiple input multiple output transmissions. The communication apparatus comprises: circuitry, which, in operation, generates a physical layer protocol data unit (PPDU) comprising a signal field that indicates resource unit (RU) assignment information for a plurality of other communication apparatuses; and a transmitter, which, in operation, transmits the PPDU to the plurality of other communication apparatuses in two or more 80 MHz frequency segments; wherein when one of the plurality of other communication apparatuses parks in one of the two or more 80 MHz frequency segments, RU assignment information corresponding to the one of the plurality of other communication apparatuses is indicated in the signal field transmitted in the one of the two or more 80 MHz frequency segments.
