(54) Title: COMBINATION THERAPY

(57) Abstract: The present invention relates to a method for the production of an antiangiogenic and/or vascular permeability reducing effect in a warm-blooded animal such as a human which is optionally being treated with ionising radiation, particularly a method for the treatment of a cancer, particularly a cancer involving a solid tumour, which comprises the administration of AZD2171 in combination with a platinum anti-tumour agent; to a pharmaceutical composition comprising AZD2171 and a platinum anti-tumour agent; to a combination product comprising AZD2171 and a platinum anti-tumour agent for use in a method of treatment of a human or animal body by therapy; to a kit comprising AZD2171 and a platinum anti-tumour agent; to the use of AZD2171 and a platinum anti-tumour agent in the manufacture of a medicament for use in the production of an antiangiogenic and/or vascular permeability reducing effect in a warm-blooded animal such as a human which is optionally being treated with ionising radiation.
