(54) Title: SYSTEMS AND METHODS FOR DETECTING ANOMALIES FROM DATA

(57) Abstract: The present disclosure concerns methods and/or systems for processing, detecting and/or notifying for the presence of anomalies or infrequent events from data. Some of the disclose methods and/or systems may be used on large-scale data sets. Certain applications are directed to analysing sensor surveillance records to identify aberrant behaviour. The sensor data may be from a number of sensor types including video and/or audio. Certain applications are directed to methods and/or systems that use compressive sensing. Certain applications may be performed in substantially real time.
