

**INFORMATION MONITORING SYSTEM AND METHOD FOR INDUSTRIAL
CONTROL DEVICE NETWORK, COMPUTER-READABLE STORAGE MEDIUM, AND
COMPUTER DEVICE**

ABSTRACT

The present disclosure provides an information monitoring system and method for an industrial control device network, a computer-readable storage medium, and a computer device. The information monitoring system includes: a data acquisition module, configured to obtain device information of a network device in an industrial control device network; an information scheduling engine module, configured to receive the device information and store the device information into a database; and a database, configured to store the device information. The present disclosure can realize effective information monitoring for the industrial control device network.
