US Patent Application Publication No. 2010/0327525

[Summary of Invention]

[Technical Problem]

[0005]

~~The~~ Embodiments of the present invention seek to provide~~s~~ monitoring packages of shuffled game cards of a casino in real time, in which the casino can immediately cancel a game when something unpredictable occurs by managing all the packages of the shuffled game cards present in the casino. A reason why the management is important is that if the shuffled playing cards on a table are the ones lost once in the casino, someone may know arrangement thereof.

[0006]

~~The~~ Embodiments of the present invention ~~has been made to solve the above described problem, and~~further seek to provide a system for monitoring packages of shuffled game cards for a casino to stop the package of some sort of suspicious shuffled game cards in the casino by managing all the packages of the shuffled game cards in the casino.

[Solution to Problem]

[0007]

~~In order to solve the above described conventional problem,~~An aspect of the present invention provides a system for managing packages of shuffled playing cards, the system having: packages of shuffled playing cards in which

playing cards included in a predetermined number of decks are shuffled in random order and are individually packed in one package, and in which a unique ID code is attached to each unique package of the shuffled playing cards; a game table at which a game is performed using the shuffled playing cards; a storage box that is installed beside the game table, stores the plurality of packages, includes one or more readers that read the ID codes of all the packages, and includes an openable lid so that the packages can be taken out one by one; and a control device for monitoring whether or not the packages are present in the storage box by monitoring the ID codes of the packages read by the readers, and for outputting monitoring results.

In addition, embodiments of the present invention provide~~s~~ packages of shuffled playing cards for being used in the above-described system.

[0008]

~~In order to solve the above described conventional problem,~~ Another aspect of the present invention provides a storage box that stores packages of shuffled playing cards and monitors ID codes attached to the packages, the storage box having: a storage box that stores the plurality of packages, includes one or more readers that read the ID codes of all the packages, and includes an openable lid so that the packages can be taken out one by one; and a control device for monitoring whether or not the packages
