

# **METHODS FOR READING DATA FROM A STORAGE MEDIUM USING A READER AND STORAGE DEVICES**

## **Abstract**

According to various embodiments, a method for reading data from a storage medium using a reader may be provided. The method may include: reading a first signal with a reader head of the reader at a first position of the storage medium; reading a second signal with a reader head of the reader at a second position of the storage medium; and determining data stored at a pre-determined position of the storage medium based on the first signal and based on the second signal.
