

## ABSTRACT OF THE SPECIFICATION

---

Disclosed is a compound as shown in general formula I or a pharmaceutically acceptable salt, tautomer, mesomer, racemate, enantiomer, and diastereomer thereof. The compound of the present invention significantly improves the degradation effect of GSPT1 protein and the anti-proliferative inhibition activity of AML and solid tumor cells. Therefore, the compound of the present invention can be used in the preparation of a medicament for treating or preventing diseases related to GSPT1, IKZF1, IKZF2, IKZF3, CK1 $\alpha$ , N-MYC or C-MYC protein mutation, expression imbalance, and allostery and functional abnormalities; in addition, said compound can be used to prepare a GSPT1 degrading agent.
