- (54) Title:** BASSINET ACCESSORY FOR A PLAYARD

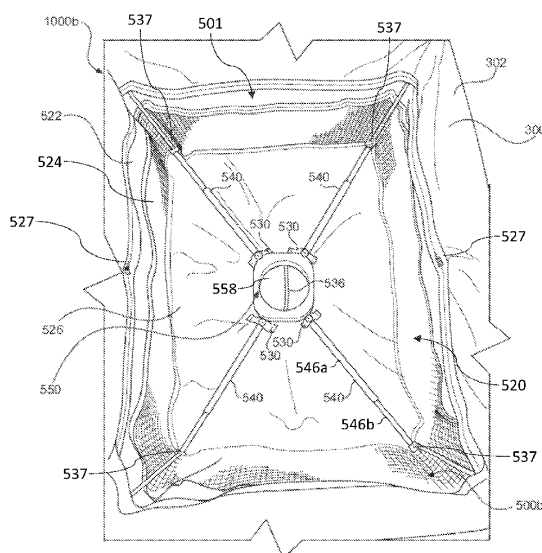

FIG. 48

- (57) Abstract:** A bassinet accessory for a foldable playard, wherein the bassinet and playard are folded and unfolded together. When unfolded, the bassinet is relatively shallow from a top of the playard so that a caregiver may more easily place a child into, and remove the child from, the bassinet. A bassinet mattress is supported by a central hub on the bottom of the bassinet and four support tubes coupled to the hub and extending to respective bottom corners of the bassinet. During folding, the bassinet hub travels in a vertical direction and the support tubes rotate from a horizontal to a vertical position, becoming parallel with respective legs of the playard. Thus, in the compact folded configuration, the bassinet hub is surrounded by and within the folded frame of the playard or flush with the top of the playard (so as not to appreciably extend beyond a top of the playard).
