(54) Title: A SAFETY MECHANISM FOR A COCONUT SCRAPER

Figure. 2

(57) Abstract: Present disclosure discloses a safety mechanism for a coconut scraper (100). The safety mechanism includes a tool assembly (103) detachably coupled to a motor (106) of the coconut scraper (100). The tool assembly (103) is configured to displace between a first position and a second position corresponding to load applied on the tool assembly (103). Further, the safety mechanism includes an activation unit (107) communicatively coupled to the motor (106). The tool assembly (103) is configured to activate the activation unit (107) at the second position, for powering the motor (106) of the coconut scraper (100). The configuration of the safety mechanism facilitates powering the motor (106) only when the load beyond the threshold is applied on the tool assembly (103), thus ensuring safety of the user.
