

MASK-CLEANING APPARATUS

ABSTRACT OF DISCLOSURE

A mask-cleaning apparatus includes a frame, a wet cleaning mechanism supported on the frame, and a dry cleaning mechanism supported on the frame and located after the wet cleaning mechanism in a direction of feeding a clean-room wiper. The wet cleaning mechanism wipes a mask before the dry cleaning mechanism wipes the mask. Each of the wet and dry cleaning mechanisms includes a wiping module that includes a vertical plate, a feeder reel, a retriever reel, direction-changing rollers and a pushing roller. The wiping module of the wet cleaning mechanism includes a sprayer mechanism adapted for spraying cleaning liquid onto a portion of the clean-room wiper on the pushing roller.
