(54) Title: METHOD AND APPARATUS FOR INTER-USER DEVICE TRANSFER (IUT) IN A NETWORK BASED MOBILITY DOMAIN

FIG. 4C

(S7) Abstract: A method and apparatus for performing Inter-User Equipment Transfer (IUT) across any internet protocol (IP) based network. This framework allows for preparation, execution and completion of data transfer at a target device through registration with a Local Mobility Anchor (LMA) and receipt of an IUT request. The target device receives and stores an IP address or a source device. The IP address is used to transmit session information.
