- (54) Title: ACTIVE ASSAILANT PROTOCOL FOR EMERGENCY DISPATCH

FIG. 1

(57) Abstract: Systems and methods are provided to guide an emergency dispatcher in responding to emergency calls involving an active assailant. The systems and methods can include an emergency police dispatch protocol configured to facilitate rapid, uniform, and consistent handling of events involving active assailants. The emergency police dispatch protocol includes one or more dispatch protocols configured for particular incidents or emergency situations, such as to aid the dispatcher in processing calls relating to active assailants. The emergency police dispatch protocol presents a pre-scripted interrogation, including preprogrammed inquiries for a dispatcher to ask the caller. The pre-scripted interrogation of the dispatch protocol facilitates rapid, uniform, and consistent responses to incidents with active assailants. The dispatch protocol may facilitate deployment of responders as quickly as possible to active assailant events and update responders with information as it is gathered.
