

ABSTRACT**ARYLALKYLCARBAMATE CARBAMATES, PREPARATION METHOD THEREOF AND USE OF SAME IN THERAPEUTICS**

The invention relates to a compound having general formula (I), wherein: n represents an integer of between 1 and 6; A is selected from one or more X, Y and/or Z groups; X represents an optionally-substituted C₁₋₂-alkylene group; Y represents an optionally-substituted C₂-alkenylene group or a -C_{=C-} group; Z represents a C₃₋₇-cycloalkyl group having formula (II) in which m represents an integer of between 1 and 5, and p and q represent integers and are defined such that p+q equals a number of between 1 and 5; R₁ represents a hydrogen atom, a halogen atom or a hydroxyl, cyano, nitro, C₁₋₃alkyl, C₁₋₃-alkoxy, C₁₋₃-thioalkyl, C₁₋₃-fluoroalkyl, C₁₋₃-fluoroalkoxy, C₁₋₃-fluorothioalkyl group; R₂ represents a hydrogen atom, a halogen atom or a cyano, nitro, hydroxyl, C₁₋₃alkyl, C₁₋₃-alkoxy, C₁₋₃-thioalkyl, C₁₋₃-fluoroalkyl, C₁₋₃-fluoroalkoxy, C₁₋₃-fluorothioalkyl group, or an optionally-substituted aromatic or heteroaromatic group; R₃ represent either a 2,2,2-trifluoroethyl group or an optionally-substituted phenyl group; and R₆ and R₇ represent independently of each of other a C₁₋₃-alkyl group, a phenyl; said compound taking the form of a base, an acid addition salt, a hydrate or a solvate. The invention also relates to the use of the compound in therapeutics.
