(54) Title: INTERFACE MATERIALS AND METHODS OF PRODUCTION AND USE THEREOF

(57) Abstract: Layered interface materials described herein comprise at least one crosslinkable thermal interface component and at least one compliant fibrous interface component coupled to the thermal interface component. A method of forming layered interface materials comprises: a) providing a crosslinkable thermal interface component; b) providing a compliant fibrous interface component; and c) physically coupling the thermal interface component and the compliant fibrous interface component. At least one additional layer, including a substrate layer, can be coupled to the layered interface material.
