

ABSTRACT

PRESS-FITTING DEVICE, PRESS-FITTING JIG, AND MANUFACTURING DEVICE

5

A press-fitting device 10 is equipped with a support portion 22 and a pressing mechanism 30 having a press-fitting tool 32 capable of movement. The press-fitting tool 32 is equipped with a pressing portion 33 for pressing a press-fitting component A by a pressing surface 33a, a restriction portion 34 having a restriction surface 34a capable of coming into contact with a press-fitting target component B, and a position setting mechanism 40 for setting a press-fitting position of the pressing surface 33a in the press-fitting direction and a restriction position of the restriction surface 34a in the press-fitting direction according to the press-fitting component A and the press-fitting target component B.
