(54) Title: ANTENNA, METHOD OF MANUFACTURING ANTENNA, AND ELECTRONIC APPARATUS EQUIPPED WITH ANTENNA

**(57) Abstract**

An antenna (1) having a sufficient length and a thin structure can be built in, for example, a wrist watch. Spiral wires (5, 6, 7) are provided on one or both sides of a plurality of insulating film substrates (2, 3, 4), respectively, and these substrates are stacked one on another. The wires (5, 6, 7) are electrically connected to each other, thus completing the antenna. The antenna (1) thus obtained can be built in a variety of electronic apparatus including wrist watch.
