

What is claimed is:

1. A use of a compound in the manufacture of a pharmaceutical for treatment and/or prevention of a disease or disorder associated with a hepatitis virus, wherein the disease or disorder associated with hepatitis virus is selected from hepatitis A, hepatitis B, hepatitis C, and liver cirrhosis, wherein the compound has the following structure:

where X is selected from: , and -SO₂-;

Y is selected from -NH- and -O-, and Y is absent when X is -SO₂-;

R is selected from  and ; and

R₁ is selected from , ,

 and , wherein Z is O or S;

wherein B is phenyl, optionally substituted by 1 to 4 groups independently selected from C₁₋₁₀ alkyl,

or a pharmaceutically acceptable salt thereof.

2. The use according to Claim 1 or a pharmaceutically acceptable salt thereof, wherein R is

3. The use according to Claim 1 or a pharmaceutically acceptable salt thereof, wherein R₁ is

4. The use according to Claim 1 or a pharmaceutically acceptable salt thereof, which is selected from

5. The use according to Claim 1 or a pharmaceutically acceptable salt thereof, which is selected from

6. The use according to Claim 1 or a pharmaceutically acceptable salt thereof, which is selected from

7. The use according to any one of Claims 1 to 6, wherein the compound treats and/or prevents the disease or disorder associated with hepatitis virus by modulating an immune response.

8. The use according to any one of Claims 1 to 6, wherein the pharmaceutical further comprises a drug known to treat HBV.

9. The use according to Claim 8, wherein the pharmaceutical treats and/or prevents the disease or disorder associated with hepatitis virus by modulating an immune response.
