

ABSTRACT

Provided is a polycarbonate resin composition, including: a polycarbonate resin (A) containing a polycarbonate-polyorganosiloxane copolymer (A-1) having a specific structure; a copolymer (B) having constituent units derived from acrylonitrile and styrene, and being free of a constituent unit derived from methyl methacrylate; and a copolymer (C) having constituent units derived from butadiene and methyl methacrylate, in which a content of the polyorganosiloxane block moiety in the entire resin composition is from 0.50 mass% to 10 mass%, and a content of the constituent unit derived from butadiene in the entire resin composition is from 3 mass% to 10 mass%.
