(54) Title: METHODS AND APPARATUS TO DISCOVER NETWORK CAPABILITIES AVAILABLE VIA WIRELESS NETWORKS

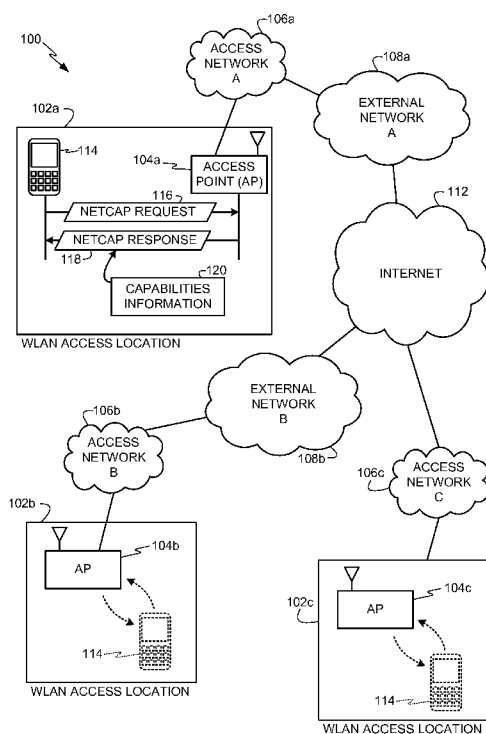

FIG. 1

(57) Abstract: Example methods and apparatus to discover network capabilities available via wireless networks are disclosed. A disclosed example method involves discovering first network capabilities by performing an exchange between a wireless terminal and an access point of a wireless local area network. The method also involves comparing the first network capabilities with cached network capabilities and joining the wireless terminal with the access point based on at least a portion of the first network capabilities matching at least a portion of the cached network capabilities.
