(54) Title: COATED PARTICLES, METHODS OF MAKING AND USING		
(57) Abstract		
A coated particle is disclosed that comprises an internal core comprising a matrix and an exterior coating. The matrix consists essentially of at least one nanostructured liquid phase, or at least one nanostructured liquid crystalline phase or a combination of the two and the exterior coating comprising a nonlamellar crystalline material. Methods of making and methods of using the coated particle are disclosed.
