ABSTRACT

INPUT OF CHINESE CHARACTERS INTO COMPUTER BY
STROKE(S) SELECTION

A computer screen displays a set of stroke(s) for Chinese characters for selection 1. By selecting one of these stroke(s), a series of Chinese characters bearing this stroke(s) will be displayed 2 and is ready for selection and input into the computer. Upon further selection on this set of stroke(s) 1, the computer screen displays only those Chinese characters bearing the combination of the two strokes 3. This reduced list of Chinese characters is ready for selection and input into the computer. This method applies to both Traditional Chinese characters and Simplified (Modern) Chinese characters.
