What is claimed is:

1. A cosmetic composition comprising a mixture of a first saccharide-based surfactant having a first hydrophilic portion consisting of a polymer of monosaccharide or disaccharide and a second saccharide-based surfactant having a second hydrophilic portion consisting of a monosaccharide or a disaccharide, the first hydrophilic portion of the first saccharide-based surfactant being more hydrophilic than the second hydrophilic portion of the second saccharide-based surfactant; and a natural oil-soluble ingredient,
wherein the composition contains the mixture of the first saccharide-based surfactant and the second saccharide-based surfactant in an amount of 0.20 wt.% to 1.50 wt.% with respect to the total weight of the composition, and contains the natural oil-soluble ingredient in an amount of 5 wt.% to 15 wt.% with respect to the total weight of the composition, and
wherein a weight ratio of the second saccharide-based surfactant to the first saccharide-based surfactant is 0.4 to 2.5:1.

2. The cosmetic composition as claimed in claim 1, wherein the composition is an oil-in-water type composition.

3. The cosmetic composition as claimed in claim 1, wherein the composition has a viscosity of 1,000 to 4,000 cps.

4. The cosmetic composition as claimed in claim 1, wherein first saccharide-based surfactant includes at least one selected from the group consisting of polyglyceryl-3-methyl glucose distearate and inulin lauryl carbamate.

5. The cosmetic composition as claimed in claim 1, wherein the second saccharide-based surfactant includes at least one selected from the group consisting of sucrose fatty acid ester, cetearyl glucoside, arachidyl glucoside, and C12-20 alkylglucoside.

6 The cosmetic composition as claimed in claim 1, wherein the natural oil-soluble ingredient comprises:
a solid oil-soluble ingredient including a surfactant, said solid oil-soluble ingredient comprising a fat, a wax, a higher alcohol, a higher fatty acid, or a hydrocarbon,

wherein the solid oil-soluble ingredient has a melting temperature of 30 ℃ or above and being in the solid state at the room temperature; or

Formatted: No underline

a liquid oil-soluble ingredient including an oil, an ester, or a hydrocarbon, wherein the liquid oil-soluble ingredient is in the liquid state at a room temperature.

7. The cosmetic composition as claimed in claim 1, wherein the composition further comprises at least one ingredient selected from green tea polysaccharide, mushroom-derived yeast extract, and niacinamide.

8. The cosmetic composition as claimed in claim 7, wherein the composition contains the green tea polysaccharide and the mushroom-derived yeast extract each at an amount of 0.01 wt.% to 5.0 wt.% with respect to the total weight of the composition.

9. The cosmetic composition as claimed in claim 7, wherein the composition contains the niacinamide at an amount of 2 wt.% with respect to the total weight of the composition.

10. The cosmetic composition as claimed in any one of claims 1 to 9, wherein the composition is for improving skin luster.

11. The cosmetic composition as claimed in any one of claims 7 to 9, wherein the composition is for whitening the skin.

What is claimed is:

1. A cosmetic composition comprising a mixture of a first saccharide-based surfactant having a first hydrophilic portion and a second saccharide-based surfactant having a second hydrophilic portion, the first hydrophilic portion of the first saccharide-based surfactant being more hydrophilic than the second hydrophilic portion of the second saccharide-based surfactant; and a natural oil-soluble ingredient,

wherein the composition contains the mixture of the first saccharide-based surfactant and the second saccharide-based surfactant in an amount of 0.20 wt.% to 1.50 wt.% with respect to the total weight of the composition, and contains the natural oil-soluble ingredient in an amount of 5 wt.% to 15 wt.% with respect to the total weight of the composition, and

wherein a weight ratio of the second saccharide-based surfactant to the first saccharide-based surfactant is 0.4 to 2.5:1.

2. The cosmetic composition as claimed in claim 1, wherein the composition is an oil-in-water type composition.

3. The cosmetic composition as claimed in claim 1, wherein the composition has a viscosity of 1,000 to 4,000 cps.

4. The cosmetic composition as claimed in claim 1, wherein first saccharide-based surfactant includes at least one selected from the group consisting of polyglyceryl-3-methyl glucose distearate and inulin lauryl carbamate.

5. The cosmetic composition as claimed in claim 1, wherein the second saccharide-based surfactant includes at least one selected from the group consisting of sucrose fatty acid ester, cetearyl glucoside, arachidyl glucoside, and C12-20 alkylglucoside.

6 The cosmetic composition as claimed in claim 1, wherein the natural oil-soluble ingredient comprises:

a solid oil-soluble ingredient including a surfactant, said solid oil-soluble ingredient comprising a fat, a wax, a higher alcohol, a higher fatty acid, or a hydrocarbon, wherein the solid oil-soluble ingredient has a melting temperature of 30 ℃ or above

and being in the solid state at the room temperature; or
a liquid oil-soluble ingredient including an oil, an ester, or a hydrocarbon, wherein the liquid oil-soluble ingredient is in the liquid state at a room temperature.

7. The cosmetic composition as claimed in claim 1, wherein the composition further comprises at least one ingredient selected from green tea polysaccharide, mushroom-derived yeast extract, and niacinamide.

8. The cosmetic composition as claimed in claim 7, wherein the composition contains the green tea polysaccharide and the mushroom-derived yeast extract each at an amount of 0.01 wt.% to 5.0 wt.% with respect to the total weight of the composition.

9. The cosmetic composition as claimed in claim 7, wherein the composition contains the niacinamide at an amount of 2 wt.% with respect to the total weight of the composition.

10. The cosmetic composition as claimed in any one of claims 1 to 9, wherein the composition is for improving skin luster.

11. The cosmetic composition as claimed in any one of claims 7 to 9, wherein the composition is for whitening the skin.

What is claimed is:

1. A cosmetic composition comprising a mixture of a first saccharide-based surfactant having a first hydrophilic portion consisting of a polymer of monosaccharide or disaccharide and a second saccharide-based surfactant having a second hydrophilic portion consisting of a monosaccharide or a disaccharide, the first hydrophilic portion of the first saccharide-based surfactant being more hydrophilic than the second hydrophilic portion of the second saccharide-based surfactant; and a natural oil-soluble ingredient,
wherein the composition contains the mixture of the first saccharide-based surfactant and the second saccharide-based surfactant in an amount of 0.20 wt.% to 1.50 wt.% with respect to the total weight of the composition, and contains the natural oil-soluble ingredient in an amount of 5 wt.% to 15 wt.% with respect to the total weight of the composition, and
wherein a weight ratio of the second saccharide-based surfactant to the first saccharide-based surfactant is 0.4 to 2.5:1.

2. The cosmetic composition as claimed in claim 1, wherein the composition is an oil-in-water type composition.

3. The cosmetic composition as claimed in claim 1, wherein the composition has a viscosity of 1,000 to 4,000 cps.

4. The cosmetic composition as claimed in claim 1, wherein first saccharide-based surfactant includes at least one selected from the group consisting of polyglyceryl-3-methyl glucose distearate and inulin lauryl carbamate.

5. The cosmetic composition as claimed in claim 1, wherein the second saccharide-based surfactant includes at least one selected from the group consisting of sucrose fatty acid ester, cetearyl glucoside, arachidyl glucoside, and C12-20 alkylglucoside.

6 The cosmetic composition as claimed in claim 1, wherein the natural oil-soluble ingredient comprises:
a solid oil-soluble ingredient including a surfactant, said solid oil-soluble ingredient comprising a fat, a wax, a higher alcohol, a higher fatty acid, or a hydrocarbon,

wherein the solid oil-soluble ingredient has a melting temperature of 30 ℃ or above and being in the solid state at the room temperature; or
a liquid oil-soluble ingredient including an oil, an ester, or a hydrocarbon, wherein the liquid oil-soluble ingredient is in the liquid state at a room temperature.

7. The cosmetic composition as claimed in claim 1, wherein the composition further comprises at least one ingredient selected from green tea polysaccharide, mushroom-derived yeast extract, and niacinamide.

8. The cosmetic composition as claimed in claim 7, wherein the composition contains the green tea polysaccharide and the mushroom-derived yeast extract each at an amount of 0.01 wt.% to 5.0 wt.% with respect to the total weight of the composition.

9. The cosmetic composition as claimed in claim 7, wherein the composition contains the niacinamide at an amount of 2 wt.% with respect to the total weight of the composition.

10. The cosmetic composition as claimed in any one of claims 1 to 9, wherein the composition is for improving skin luster.

11. The cosmetic composition as claimed in any one of claims 7 to 9, wherein the composition is for whitening the skin.
