(54) Title: METHOD AND SYSTEM FOR BEAM INDICATION IN WIRELESS NETWORK

FIG. 4

(57) Abstract: Methods and systems for techniques for indicating beam information that can be used on access links, backhaul links, and control links are disclosed. In an implementation, a method of wireless communication includes receiving a beam indication for access links comprising at least one of a first forwarding link from a network node to a wireless communication device, or a second forwarding link from the wireless communication device to the network node, receiving a beam indication for backhaul links comprising at least one of a third forwarding link from a wireless communication node to the network node, or a fourth forwarding link from the network node to the wireless communication node, and receiving a beam indication for control links comprising at least one of a first control link from the wireless communication node to a network node, or a second control link from the network node to the communication node.
