ABSTRACT OF THE DISCLOSURE

CYANATE ESTER COMPOSITION AND CURED PRODUCT THEREOF

According to the present invention, a cyanate ester-epoxy resin composition giving a cured product which
5 is excellent in mechanical properties is provided.

More particularly, a cyanate ester composition comprising (A) a cyanate ester in which the total content of impurities containing imino carbonates, alkyl cyanamides, partially substituted cyanates and phenols
10 is 5% or less, or a prepolymer thereof, and (B) an epoxy resin is provided.
