(54) Title: ROLLERCROSS GAME AND RINK THEREFOR

(57) Abstract

An inline floor hockey playing surface including a substantially horizontal planar main playing surface (10) provided with a goal or net close to either end of the playing surface and opposite thereto. A ramped half-pipe surface surrounds the horizontal planar surface. An upper deck platform (14) surrounds the top of the ramped half-pipe surface. Side walls (15) and end walls (17) enclose the upper deck platform. Players can utilize both the ramped half-pipe surface as well as the upper deck platform surface during game competitions. A game is played on this surface in which players from two opposing teams utilize a modified lacrosse stick (18) to manipulate a ball (22) into the opponent's goal. Unlike lacrosse, the ball may be rolled on the ground as in hockey, although man movement of the ball will be airborne from net to net.
